Demo - Tutorial: YoloV8

Monday, 29 September 2025 12:45 (45 minutes)

Core concepts and practical steps for using YOLOv8 in object detection tasks. Key components of the architecture and how to prepare custom datasets. How to train, fine-tune, and run inference on images and video. What it means for real-world computer vision applications and deployment.

Presenter: HIDRI , Klodjan (FORTH)
